

Glyco-Nutrition, Yeast & Fungi

And you thought Candida was harmless - when overgrowth of candida takes hold - the side effects are frightening - but not as frightening as how we deal with it medically - we actually give it antibiotics which actually help its survival and growth!!!

Would you believe that at least 80 toxins are produced by the invading Candida fungus, including Canditoxin and Ethanol. These both cause your brain to release its own toxic chemical compounds that interfere with your nervous system.

Canditoxins can even trigger nervousness, paralysis, long-term immune system impairment and possible death. Ethanol causes fatigue, aggression, depression, brain fog and toxicity.

Candidiasis is a major factor in metabolic disorders such as high LDL Cholesterol, neuron developmental disorders (Autism/PDD), Autoimmune diseases (Addison's, Fibromyalgia, Lupus, Rheumatoid arthritis, etc . . .), Bowel diseases (Crohn's, Ulcerative colitis, IBS), Chronic Fatigue Syndrome and Asthma.

Glyco8 exclusively from PureDetox, can help your body to repair, regulate, regenerate and protect itself, before, during and after Candida overgrowth. Good health means having control - thankfully our Glyco8 is the key to restoring control over Candida growth. Your body is a synchronized network of cells that communicate in concert, like a perfectly God-timed orchestra. This brand new technology has been in nature since the world began - however - we are just starting to realise it - inter-cellular intelligence!! Ajit Varki sees it as a journey of exploration. "Its like we've just discovered the continent of North America. Now we have to send out scouting parties to find out how big it is...."

Glyco8 empowers cell-to-cell communication to provide optimum health and well being. Candida tries to trick you by preventing your immune system from detecting its invasion until it has completely overthrown your unprotected immune system. Given the chance, Candida will steal away your health. Glyco8 is specifically designed to protect you. Glyco8 simply gives your immune system the reinforcement and support it requires to fight against the Candida invasion.

Here is the overwhelming list of ailments and conditions this parasite can cause:

- Because the Candida fungus bores into your intestinal walls, toxins can leak into the bloodstream. This is called Leaky Gut Syndrome: Common symptoms are . .
- Food allergies and intolerances
- Migraines
- Foggy brain
- Muscle aches
- After Candida has successfully invaded your entire body, it can disrupt the endocrine system causing:
- Thrush
- Cystitis
- PMS
- Menstrual irregularities
- Joint pains
- Asthma
- Hayfever
- Sinusitis
- Fungal infections of the nails/skin, e.g. athlete's foot
- Weight gain or weight loss
- Ear infections
- Chronic tiredness
- Allergies
- Symptoms of Candida contamination in the intestines include:
- Bloating
- Flatulence
- Diarrhea and/or constipation
- Anal itching

The following are some factors that can make you more vulnerable to a Candida infection:

- Infancy or old age
- Warm climate
- Plastic pants (babies), pantyhose (women) and dental plates.
- Immune deficiencies e.g. low immunoglobulin levels, HIV.
- Broad spectrum antibiotic treatment.
- Contraceptive pills or injections and pregnancy.

- Chemotherapy and immunosuppressive medications such as systemic steroids.
- Diabetes mellitus, Cushing's syndrome and other endocrine conditions.
- Iron deficiency.
- General debility, e.g., from cancer or malnutrition.
- Underlying skin disease, e.g., psoriasis, Lichen planus.
- Consuming foods injected with antibiotics.
